

APS RESOURCE
YOUR AFTERMARKET SOLUTION

Gates & Barriers

- ▼ Dock Impact Barrier™
- ▼ Dock Impact Barrier - LC™
- ▼ Work Safe Gate™

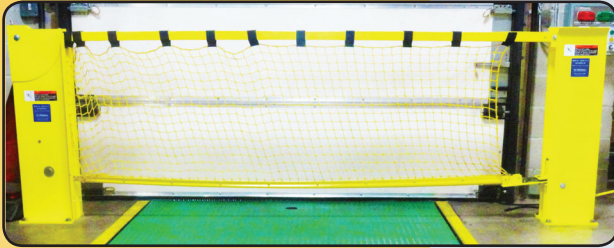

APS Resource can provide your facility with a Dock Impact Barrier or a Work Safe Gate to enhance the safety of your facility. Our easy to use Barriers and Gates help you comply with industrial safety standards.

Dock Impact Barrier™

The Dock Impact Barrier™ can reduce the occurrence of accidents due to fork lift, pallet jack or pedestrians falling off the dock when the door is open.

Features:

- Stops a 10,000 lb. gross load at 4 mph
- 42" top rail meets OSHA 1910.23 standard for withstanding 200 lbs. of force from any direction
- High visibility yellow netting
- Easy manual operation, no electrical requirement
- Protects overhead door and track
- Optional interlock for maximum safety

Dock Impact Barrier-LC™

While still meeting limited overhead clearance requirements, the Dock Impact Barrier - LC™ can reduce the occurrence of accidents due to fork lift, pallet jack or pedestrians falling off the dock when the door is open.

Features:

- Stops a 10,000 lb. gross load at 4 mph
- 42" top rail meets OSHA 1910.23 standard for withstanding 200 lbs. of force from any direction
- High visibility yellow with powder coated columns and safety striping on the rails
- Easy manual operation, no electrical requirement
- Reduces overhead clearance by 30" (compared to standard Dock Impact Barrier)
- Optional interlock for maximum safety

Work Safe Gate™

The Work Safe Gate provides excellent visual protection for personnel. The easy to operate gate lifts effortlessly out of the opening for complete access.

Features:

- Effective barrier for protecting personnel working in a hazardous area
- High visibility yellow/black striping
- 42" top rail meets OSHA 1910.23 standard for withstanding 200 lbs of force from any direction
- Easy manual operation, no electrical requirement
