

Rapid Install for Vertical Lift Commercial Sectional Doors

Time is money! A fast and easy installation means lower labor costs. The Rapid Install for Vertical Lift doors is designed specifically for commercial warehouse and dock doors in small and large commercial projects using quality standard Kelley 2" steel sections and a simplified track and hardware configuration. Available on 20-gauge Kelley KP2002, KP2012, KE2022, 24-gauge Kelley KP2402, KP2412, KE2422 and nominal 24-gauge Kelley KP2502 and KP2512 doors.

One-piece Vertical Lift track

- Integrated End Bearing Plate requires less assembly on the jobsite
- One-man installation cuts labor costs per job
- Heavy .063 gauge 1-piece track
- Available for doors up to 9' 2" w x 10' h

One-piece, curved VL track (for one-man installation)

Simplified Hardware Configuration

- Fewer wall anchors required so drilling and installation time are decreased
- Engineered to need fewer trips up and down the wall for faster, safer installation
- Self-lubricating nylon rollers
- Wide body hinges
- Tested to more than 10,000 cycles to ensure long term performance

Integrated End Bearing Plate requires no assembly.

Optional Upgrades

- Keyed hollow shaft used with a commercial operator or hoist
- 10-ball Steel Rollers
- High Cycle Springs
- Optional 16ga end and center stiles
- Wind Load options available

Durable, heavy .063 gauge track

Ribbed panel sections

- Open back: Kelley KP2002, KP2402, KP2502
- Vinyl-backed polystyrene: Kelley KP2012, KP2412, KP2512
- Polystyrene with steel back panel: Kelley KE2022, KE2422
- All standard window and panel insert options

Quality hardware tested to 10,000 cycles
