

## IRONSIDE™ DOCK SEAL

#### WITH HEAD PAD MODEL IDS-

DOCK SEAL SPECIFICATIONS

#### **Product Summary**

The Serco Ironside Model IDS-HP Dock Seal is designed to resist wear damage from the movement of air ride suspension trailers, intermodal trailers, sharp edges and yard spotters. The exclusive UHWR fabric offers up to 10 times the abrasion resistance of competitive fabrics tested.

#### **Design Highlights**

- Exclusive UHWR™ (Ultra High Wear Resistant) fabric on wear surfaces. Full height on side pads and full width on head pad
- Exclusive Guardian<sup>™</sup> head pad helps defend against damage from yard spotters and air ride suspension trailers
- Exclusive roll-formed, galvanized steel framing
- Exclusive heat-sealed, full length, yellow guide stripes
- Endurance tested foam core is continuously bonded to frame surface with flexible, nonflammable adhesive
- Highly resilient, open-celled polyurethane foam keeps original shape and compresses easily to extend the seal life
- Side pad bottoms are tapered to avoid pinching and wear
- All pads are vented for air and moisture release
- Heavy-duty, galvanized steel mounting brackets included

Air ride suspension trailers can move up and down as much as 8" during loading/unloading.

Stationary head pads with wear pleats can get worn down over time by trailer movement, leading to detachment and resulting in an uprotected wall surface and loss of seal.

Guardian's 4" exposure wear panels move with the trailer, extending fabric life in key wear areas.
